

Post & Vine

Post & Vine is a Greenscreen® modular ecosystem combining powder-coated steel posts, Greenscreen trellis, integrated bench seating, and Wilshire Planters. Fences, Cantilevers, and Pergolas can be used independently or combined to create unique configurations.

Post & Vine's placemaking capabilities make it ideal for hospitality, campuses, and amenity spaces, both at-grade and on-structure. Add shade and create vibrant outdoor spaces where people like to gather.

Post & Vine

Posts

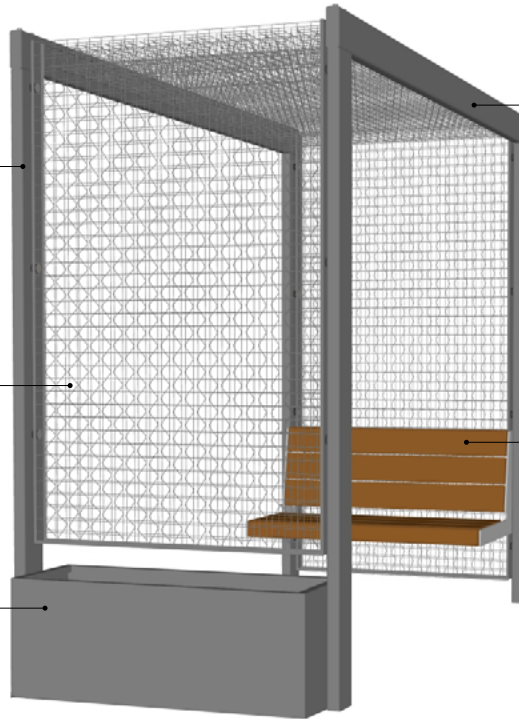

Posts are 2x6, 3/16" wall A500 rectangular steel tubes.

Trellis Panels

Vertical and overhead panels constructed with Greenscreen® trellis.

Planters

Wilshire Planters can be specified to fit between posts. Baseplate mounted posts require Wilshire Planters with Toe Kick.

Overhead Beams

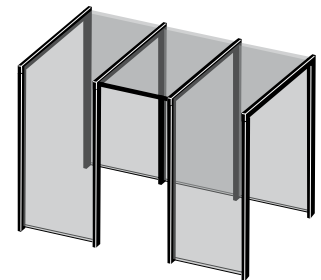

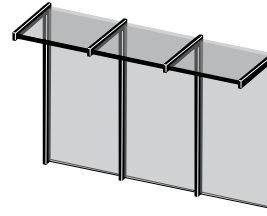

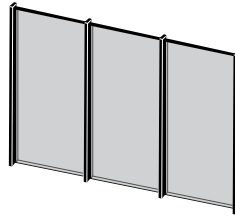

Overhead beams are 2x6, 3/16" wall A500 rectangular steel tubes, and are mechanically fastened to the posts in the Cantilever and Pergola applications.

Benches

Benches mount directly to posts. Arms and skate stops are available. Benches can be configured for ADA compliance.

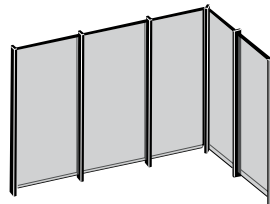

Applications

Post & Vine can be configured with fences, cantilevers, and pergolas. The system is designed for on-grade or on-structure installation.

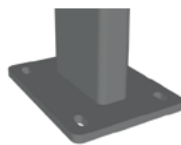

Corner Configuration

Fences can be configured with corners and can accommodate angle-cut Wilshire Planters.

Post Mounting

Posts can be embedded with rebar reinforcement, or specified with baseplates for surface mounting.

Documentation

Complete technical details and submittal drawings are available at tournesol.com/cad-models.

Engineering

The Post & Vine system has been pre-engineered for most site conditions with the sizes listed below. Third-party PE stamped drawings available upon request. Some locations may need additional engineering to meet local requirements. Modifications beyond these sizes may also require site-specific engineering:

- Height: 8'-6"
- Post Spacing: 4'-4"
- Pergola Span: 8', 10', 12', 14'
- Cantilever Span: 4'

CUSTOM

Tournesol Advisors can discuss feasibility, value engineering, and lead times at any phase in your project.

We offer concept collaboration, shop drawings, submittal packages, and stamped calculations and drawings, packaged by licensed professional engineers.

Post & Vine

Dimensions

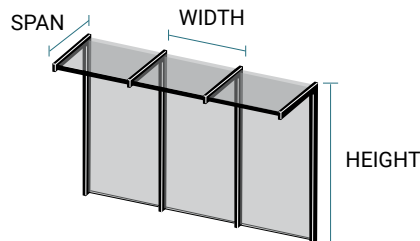

Width: Panels are 52"OC

Fence Height: 4'-16'

Cantilever Height: 8'6"

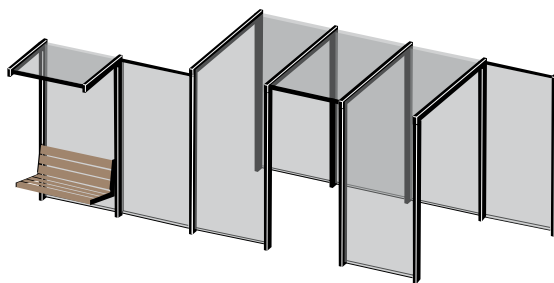

Pergola Height: 8'6"

Dimensions can be customized to meet site-specific needs.

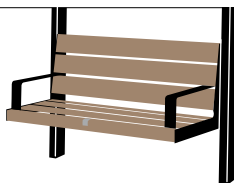

Combining Applications

Applications can be combined to create unique configurations.

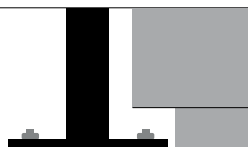

Incorporating Benches

Benches mount directly to posts. Arms and skate stops are available. Benches can be configured for ADA compliance.

Incorporating Planters

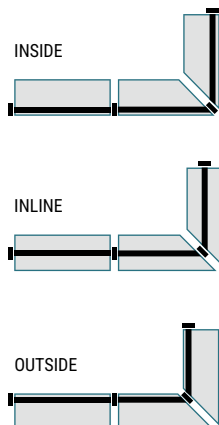

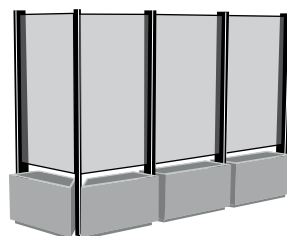

Wilshire Planters can be specified to fit between posts. Baseplate mounted posts require Wilshire Planters with Toe Kick.

Corners with Planters

Standard corners are 90°; other angles available as custom.

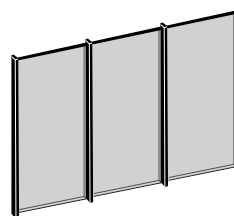

Corners with angle-end Wilshire Planters can be configured in the following three ways: inside, inline, or outside.

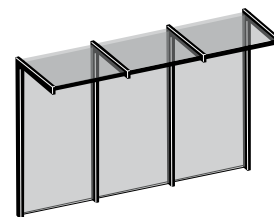

Budgetary Pricing

The linear foot pricing is for budgetary purposes only, and may not reflect current cost. Linear foot costs are for fence, cantilever, and pergola only, and do not include benches or planters. For pricing, please submit a quote request at tournesol.com/request-quote.

FENCE	height	cost per linear foot
	4-6'	\$289
	6'-8'	\$369
	8'-10'	\$439
	10'-12'	\$513
	12'-14'	\$583
	14'-16'	\$653

CANTILEVER	height	span	cost per linear foot
	8'6"	4'	\$430

PERGOLA	height	span	cost per linear foot
	8'6"	8'	\$1,090
	8'6"	10'	\$1,160
	8'6"	12'	\$1,230
	8'6"	14'	\$1,300
