

Wilshire Planters

Bring life to your commercial landscape projects with Wilshire, our most popular spacemaking planter collection. Versatility, durability, and customizability set it apart—it's why the landscape architecture community specifies Wilshire on many projects. Available in round, square, and rectangular shapes, as well as with laser cut panels, or Greenscreen® trellis. Wilshire planters

are available in powder-coated aluminum, weathering steel, lightweight GFRC, and FRP fiberglass.

Shown above clockwise: Wilshire Planters with Accessory Pockets, Wilshire Planters in Weathering Steel, Wilshire Hanging Box in FRP, and Wilshire GFRC.

Wilshire Planters

GFRC Wilshire Planters

Lightweight GFRC weighs 75% less than typical cast concrete, but retains its durability, strength, and natural appearance. Wilshire planters in GFRC are great for high traffic, street level installations, but light enough to work on a roof deck. Available in 11 colors and five textures. With a few exceptions, toe kicks are available for all Wilshire Planters.

GFRC Rectangle & Square
GFRC Round
GFRC with Greenscreen® Trellis
GFRC with Laser-Cut Screen

FRP Wilshire Planters

The addition of glass fibers turns ordinary resin into a superhero! The Wilshire Planters made from FRP are the lightest among the collection yet can retain moisture-laden soil without deforming. Surface-applied textures add scratch-resistance and are available in stock or custom colors. Available in 18 colors and three textures. With a few exceptions, toe kicks are available for all Wilshire Planters.

FRP Round
FRP with Greenscreen® Trellis
FRP with Laser-Cut Screen
FRP Hanging Box

METAL Wilshire Planters

Wilshire Powder-Coated Aluminum Planters are an environmentally friendly option. Welded stiffeners are used to produce planters with the strength of steel but 40-60% of the weight.

Wilshire Weathering Steel Planters are shipped with a natural mill-scale or Pre-Weathered finish. Weathering Steel develops a reddish-brown color over time, and Pre-Weathered Steel steps up the oxidation timeline for faster results. With a few exceptions, toe kicks are available for all Wilshire Planters.

Weathering Steel Rectangle & Square
Weathering Steel Round

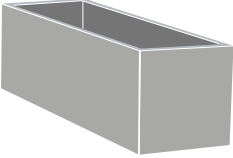

Wilshire Planters GFRC Rectangle & Square

Lightweight GFRC weighs 75% less than typical cast concrete, but retains its durability, strength, and natural appearance. Wilshire planters in GFRC are great for high traffic, street level installations, but light enough to work on a roof deck. Available in 11 colors and five textures.

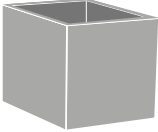

Made in Glass Fiber Reinforced Concrete (GFRC), Wilshire planters are durable in all climates and lighter than standard concrete.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

Wilshire Planters GFRC Round

Lightweight GFRC weighs 75% less than typical cast concrete, but retains its durability, strength, and natural appearance. Wilshire planters in GFRC are great for high traffic, street level installations, but light enough to work on a roof deck. Available in 11 colors and five textures.

Made in Glass Fiber Reinforced Concrete (GFRC), Wilshire planters are durable in all climates and lighter than standard concrete.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

Wilshire Planters, GFRC with Greenscreen® Trellis

- Durable, lightweight GFRC planter with powder-coated Greenscreen® trellis. 2"W x 2"L x 3"D grid.
- Trellis vertical supports fit into planter lip and are secured with discrete stainless-steel fasteners.
- Trellis is framed on top and sides and extends to planter edge so adjacent planters form a seamless trellis wall.
- Select a Greenscreen Trellis color in addition to a GFRC color and texture. Standard drain holes included.

* Add "-X" after product number to indicate optional offset mounting.

Wilshire Planters FRP Rectangle & Square

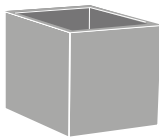

The addition of glass fibers turns ordinary resin into a superhero! The Wilshire Planters made from FRP are the lightest among the collection yet can retain moisture-laden soil without deforming. Surface-applied textures add scratch-resistance and are available in stock or custom colors. Available in 18 colors and three textures.

Wilshire Planters FRP Round

The addition of glass fibers turns ordinary resin into a superhero! The Wilshire Planters made from FRP are the lightest among the collection yet can retain moisture-laden soil without deforming. Surface-applied textures add scratch-resistance and are available in stock or custom colors. Available in 18 colors and three textures.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

Wilshire Planters, FRP with Greenscreen® Trellis

- Durable, lightweight FRP planter with powder-coated Greenscreen® trellis. 2"W x 2"L x 3"D grid.
- Trellis vertical supports fit into planter lip and are secured with discrete stainless-steel fasteners.
- Trellis is framed on top and sides and extends to planter edge so adjacent planters form a seamless trellis wall.
- Select a Greenscreen Trellis color in addition to a FRP color and texture. Drain holes available upon request.

* Add "-X" after product number to indicate optional offset mounting.

Wilshire Planters FRP Hanging Box

- Tournesol's original commercial hanging box system
- Engineered for facade installation
- Designed for easy mounting & structural integrity
- Reinforced lightweight FRP planter
- Powder-coated steel brackets
- Stainless steel mounting studs
- In production for 20 years, thousands of units installed
- Anchoring hardware not included and is at the discretion of the contractor or project engineer
- Aluminum anchor templates are available
- Works well with our irrigation modules for low maintenance.

- Reinforced lightweight FRP planter
- Powder-coated steel brackets
- Stainless steel mounting studs
- In production for 20 years, thousands of units installed
- Anchoring hardware not included and is at the discretion of the contractor or project engineer
- Aluminum anchor templates are available
- Works well with our irrigation modules for low maintenance.

HANGING BOX TEMPLATE

Aluminum and plastic template assists in correct placement of anchor holes.

PRODUCT	DESCRIPTION
WBT-1012-XX	Drilling template for -1012 size Wilshire Box. Order by length (XX=# of inches) - Aluminum and plastic.
WBT-1218-XX	Drilling template for -1218 size Wilshire Box. Order by length (XX=# of inches) - Aluminum and plastic.
WBT-1824-XX	Drilling template for -1824 size Wilshire Box. Order by length (XX=# of inches) - Aluminum and plastic.

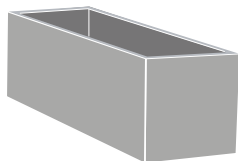

Wilshire Planters Aluminum Rectangle & Square

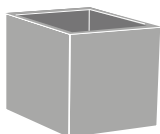

Wilshire Powder-Coated Aluminum Planters are an environmentally friendly solution. Marine-grade aluminum with welded stiffeners is used to produce planters with the strength of steel but 40-60% of the weight.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

ADDITIONAL MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

POWDER-COATED ALUMINUM

Following fully welded fabrication, Wilshire Aluminum Planters are dry steam washed and pretreated with a closed loop, environmentally friendly zirconium solution before a zinc-free epoxy primer and AAMA 2604 polyester powder-coat is applied.

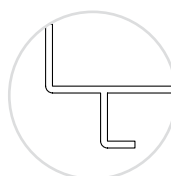

TOP LIP

Wilshire Aluminum Planters come with a standard lip return.

BASE OPTION

Wilshire Planters are available with a toe kick option.

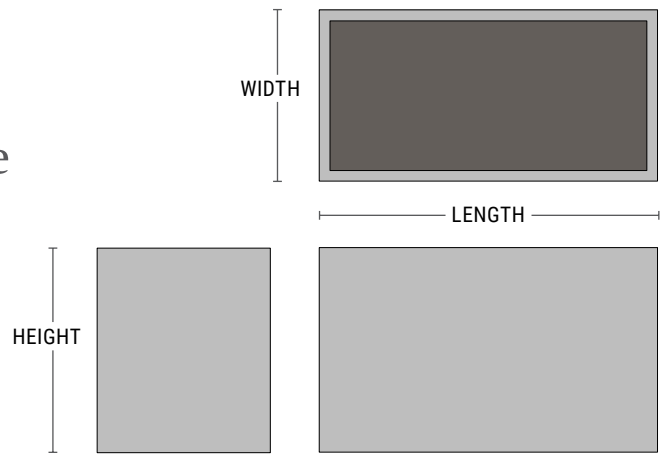

DRAINAGE

Drain Holes: Standard drain holes are 1-5/8" diameter, made free-of-charge at the factory.

Wilshire Planters Aluminum Rectangle & Square

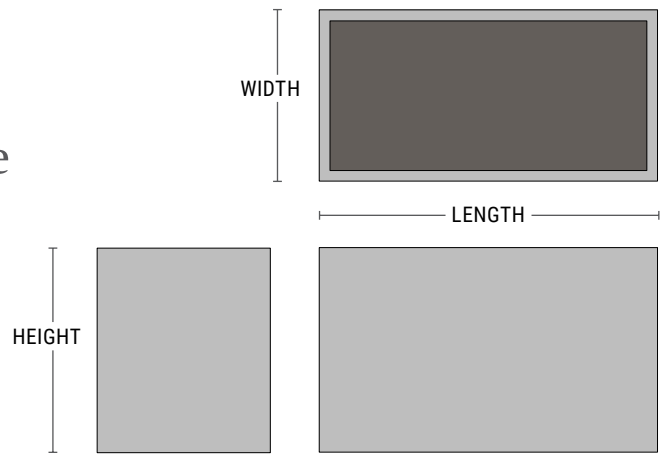

- 100% recyclable marine-grade aluminum
- Same strength as Wilshire Steel but weigh 40-60% less
- Engineered for strength with welded stiffeners
- Laser-cut & welded for consistent thickness and edge-detail at any scale
- Powder-coat over zinc-free epoxy primer

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

ADDITIONAL MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

Wilshire Planters, Aluminum Round

POWDER-COATED ALUMINUM

Following fabrication, Wilshire Aluminum Planters are dry steam washed and pretreated with a closed loop, environmentally friendly zirconium solution before a zinc-free epoxy primer and AAMA 2604 polyester powder-coat is applied.

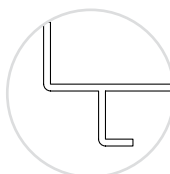

TOP LIP

Wilshire Planters in Aluminum come with a standard lip return.

BASE OPTION

Wilshire Planters are available with a toe kick option.

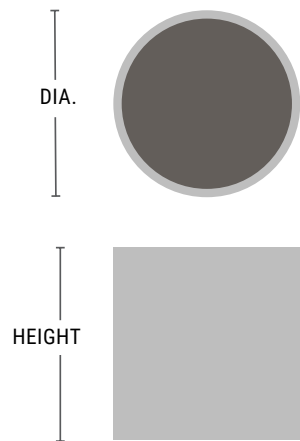

Toe kick option

DRAINAGE

Drain Holes: Standard drain holes are 1-5/8" diameter, made free-of-charge at the factory.

Wilshire Planters

Weathering Steel Rectangle & Square

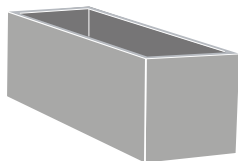

Weathering Steel planters offer a warm industrial aesthetic favored by many landscape architects. The natural red-orange oxidization forms a protective patina that develops and regenerates continuously. Our A588 and A606 grade steel planters are meticulously assembled and welded.

Weathering Steel or Pre-Weathered Steel

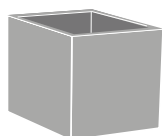

Our Weathering Steel ships with a natural mill scale finish. The initial oxidation develops within weeks and evolves over time. Pre-Weathered Steel products undergo an earth-friendly pre-treatment, which steps up the oxidation process timeline to help achieve the desired visual result faster.

Pre-Weathering Treatment

Wilshire Planters, Weathering Steel, Rectangle & Square

WEATHERING STEEL

Our Weathering Steel ships with a natural mill scale finish. The initial oxidation develops within weeks and evolves over time. Environmental conditions such as humidity, salt, and the temperature at installation can affect rust uniformity and formation rate. The color develops from a vibrant orange to a deep reddish-brown.

PRE-WEATHERED STEEL

Our Pre-Weathered Steel products undergo an earth-friendly pre-treatment, which steps up the oxidation process timeline to help achieve the desired visual result faster.

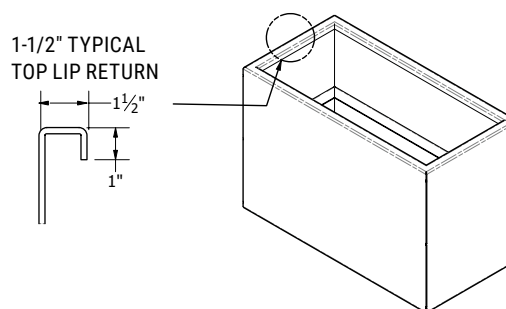

Our process begins by grit-blasting the raw mill scale surface; next we treat it with an all-natural solution of hydrogen peroxide, vinegar, and salt. Treated products cure for a day before being individually wrapped in paper and then plastic before shipping.

Raw mill scale steel and treated surfaces can be powdery and may show markings during delivery and installation. These changes are affected by humidity levels and storage.

Weathering Steel products should be unwrapped upon arrival and stored indoors if possible. Shedding during unpacking and storing may occur; protect flooring during storage and installation.

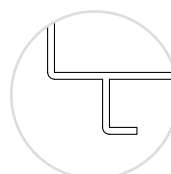

TOP LIP

Wilshire Planters Weathering Steel, Round

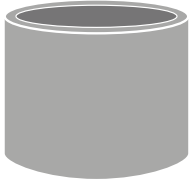

Weathering Steel planters offer a warm industrial aesthetic favored by many landscape architects. The natural red-orange oxidation forms a protective patina that develops and regenerates continuously. Our A588 and A606 grade steel planters are meticulously assembled and welded.

Weathering Steel or Pre-Weathered Steel

Our Weathering Steel ships with a natural mill scale finish. The initial oxidation develops within weeks and evolves over time. Pre-Weathered Steel products undergo an earth-friendly pre-treatment, which steps up the oxidation process timeline to help achieve the desired visual result faster.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.

WEATHERING STEEL

Our Weathering Steel ships with a natural mill scale finish. The initial oxidation develops within weeks and evolves over time. Environmental conditions such as humidity, salt, and the temperature at installation can affect rust uniformity and formation rate. The color develops from a vibrant orange to a deep reddish-brown.

PRE-WEATHERED STEEL

Our Pre-Weathered Steel products undergo an earth-friendly pre-treatment, which steps up the oxidation process timeline to help achieve the desired visual result faster.

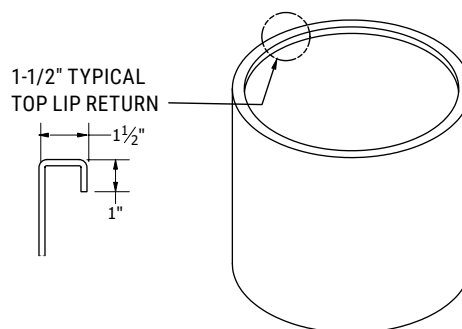

Our process begins by grit-blasting the raw mill scale surface; next we treat it with an all-natural solution of hydrogen peroxide, vinegar, and salt. Treated products cure for a day before being individually wrapped in paper and then plastic before shipping.

Raw mill scale steel and treated surfaces can be powdery and may show markings during delivery and installation. These changes are affected by humidity levels and storage.

Weathering Steel products should be unwrapped upon arrival and stored indoors if possible. Shedding during unpacking and storing may occur; protect flooring during storage and installation.

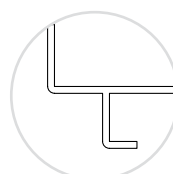

TOP LIP

Wilshire Planters in Weathering Steel come with a standard lip return.

BASE OPTION

Wilshire Planters are available with a toe kick option.

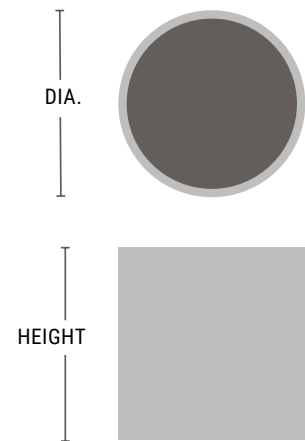

Toe kick option

DRAINAGE

Drain Holes: Standard drain holes are 1-5/8" diameter, made free-of-charge at the factory.

Wilshire Planters, Weathering Steel Round

- Fully welded 12-gauge weathering steel
- Engineered to resist deformation
- Protective weathering patina
- Optional toe kick available
- Drain holes standard
