

Wilshire Planters FRP Round

The addition of glass fibers turns ordinary resin into a superhero! The Wilshire Planters made from FRP are the lightest among the collection yet can retain moisture-laden soil without deforming. Surface-applied textures add scratch-resistance and are available in stock or custom colors. Available in 18 colors and three textures.

TOE KICK

A toe kick, or reveal, is a recessed base detail that visually offsets the planter from the paving surface to create a clean, architectural appearance and may also help conceal minor surface variations. Toe kick height varies by size. For planters installed in a run or to match a previous order, please confirm consistent toe kick height with an Advisor.

MODIFICATIONS

Standard Wilshire Planters can be modified with a broad array of options without incurring custom charges. Options are limited to those products that can support them. Speak to a Tournesol Advisor to discuss which options will work with your project.
